

MY PLANET MY FUTURE

MY PLANET
MY FUTURE
NÜKTE SÖZEN
SECONDARY
SCHOOL

As we all know there is no other planet to live other than the earth. So we should take care of the earth so much. We would like to improve environmental awareness among students.

With this project we are expecting to make students more conscious about their environmental responsibilities.

At the end of the project they will have learned especially the importance of recycling and zero waste.

They will make some logos and posters, play some games, attend some environmental activities like hiking, planting and cycling , do new materials from old materials and prepare an exhib ition at the end of the Project.
